General Information

PRICING

This price list is subject to change without notice. All agreements are contingent upon strikes, accidents or other causes of delay beyond our control. All shipments will be invoiced at the price prevailing at time of shipment. All amounts are stated in U. S. dollars.

PAYMENT TERMS

1% discount 15 days, net 30 days. There is a 1.5% service charge on all invoices not paid after 30 days. This is an annual percentage rate of 18%. All invoices paid after 15 days will be allowed NO DISCOUNTS.

FREIGHT

All freight will be F.O.B. Stenno Carbon Company. Stenno will prepay freight and bill upon invoice. Freight damage claims are to be entered by the customer with the delivering carrier.

RETURNS AND ALLOWANCES POLICY

The policy of Stenno Carbon Co. is to guarantee the quality of the products it produces within the manufacturing tolerances specified in the catalog. We will guarantee 100% of the invoiced cost of the material supplied by Stenno Carbon Co.

In the case of material supplied with a defect that it is reasonable to assume could have been detected by the forms manufacturer prior to being printed or interleaved into forms, Stenno Carbon Co. will cover only the delivery cost of the materials supplied by Stenno Carbon Co.

In those few instances where the defect could not – with reasonable inspection – have been detected by the forms manufacturer prior to being printed or collated, Stenno Carbon Co. will cover the cost of all materials and labor, but no mark-up, over direct costs.

QUALITY OF WRITE

We pride ourselves on producing a high quality product that will result in a minimum of problems. However, good carbon copy depends on using proper paper, proper writing instrument and proper writing surface. Accordingly, carbon should be tested in actual conditions of use and inspected prior to insertion into forms.

Claims and adjustments will not be entertained without notification of and approval by Stenno Carbon Co. management.

STRIPING OR PATTERN TOLERANCE

Stenno Carbon Co. guarantees to hold the tolerances as published in the catalog on striping and spot carbon patterns, but will not be responsible for holding tolerances to less than those published in the catalog. In those cases where the stripe or pattern is supplied incorrectly by Stenno Carbon Co., it is reasonable to assume that these specifications will be checked by the business forms manufacturer before or during set-up of the job. If a problem exists, Stenno Carbon Co. will be responsible only for the cost of the materials supplied by Stenno Carbon Co., but not for lost machine time or forms.

DIMENSIONAL STABILITY

The published tolerances on all marginally punched material are in the catalog. The tolerances are determined by drawing the material out straight and then measuring on a relaxed web. Material that does not meet the published specifications is not in tolerance and will be replaced by Stenno Carbon Co. Once material is interleaved into forms and is in tolerance during the interleave operation, Stenno Carbon Co. no longer has responsibility and will not pay any claim for incorrect lengths.

Stenno Carbon Co. will assume responsibility for marginally punched spot carbon or processed carbon produced by Stenno Carbon Co. for a period of 60 days from date of shipment from the Stenno Carbon Co. plant. If material is not interleaved within 60 days of shipping date and the lengths are found not to be in tolerance after this 60-day period, Stenno Carbon Co. will assume no responsibility for collated or uncollated carbon.

When Stenno Carbon Co. sells unprocessed rolls and these rolls are processed by another entity, or if slits are used in continuous forms, no liability for dimensional stability will be assumed by Stenno Carbon Co.

General Information, (continued...)

PROCEDURE FOR ESTABLISHING A CLAIM

1. When defect is noted, a Stenno Carbon Co. customer service representative should be contacted immediately by telephone. If defect appears to be transit damage, the delivering carrier must also be notified so an inspection report can be completed promptly and properly.
2. The telephone notice and any agreements regarding the claim should be immediately confirmed, in writing, by the business forms manufacturer. Representative samples of the defect should be forwarded to the customer service representative who handled the initial call.
3. The business forms manufacturer should maintain records of all efforts made to correct defects. Identified samples of defective material, along with roll labels, should be retained until the matter is resolved. This includes finished forms if product has already been printed and/or interleaved into forms.
4. When replacement of product is necessary, Stenno Carbon Co. will make every effort to make that replacement promptly. The forms manufacturer should contact his/her customer regarding the replacement deadline so that misunderstandings do not occur.
5. If the business forms manufacturer is entitled to reimbursement over and above replacement of the Stenno Carbon Co. product, the business forms manufacturer is expected to request reimbursement by submitting written records detailing all costs incurred in the reprinting of the form. Credit will not be issued until Stenno Carbon Co. receives such information in writing on business forms company letterhead.

INSPECTABLE DEFECTS

Inspectable defects would include such items as listed below. It is reasonable to assume they should be checked before forms are printed and/or interleaved:

1. Incorrect perforation position or omission of perforation when ordered
2. Incorrect tab position or tab type
3. Incorrect number of ties in longitudinal or horizontal perforation when throughout the roll
4. Registration of cross perforations (horizontal perforation) to line hold punching and/or registration of spot patterns to line hole punching or perforations
5. Incorrect color or type of material having been shipped
6. Incorrect width or footage per roll
7. Incorrect multiples or footage per roll
8. Offset of carbon on uncoated side
9. Incorrect pattern or stripe
10. Incorrect position of line hole punching or incorrect number of line hole position.

COLLATOR AND/OR PRESS TIME

No reimbursement for collator and/or press time will be made if the defect would be classified as an inspectable defect.

In those cases where credit for collator time and/or press time is justified, the credit will be issued on direct cost.

SAMPLES

All samples supplied by Stenno Carbon Co. as sales samples are subject to manufacturing tolerance of plus or minus 10% on actual delivered material. Any write outside of this will be a basis for reduction if, in the determination of Stenno Carbon Co., the write compared to standard samples exceeds the plus or minus 10% limitation. In the case of spot carbon, only spot carbon samples should be used for determination of write.

Stock Carbon Slit Rolls

Any stock roll carbon listed on an individual Stenno Carbon Co. plant's stock list will be priced according to the price list below. Stock items may be combined for better unit pricing.

Stock Carbon Slit Rolls

PRICE LIST

STANDARD WEIGHT – 8 LB.

LIGHTWEIGHT TISSUE

All products listed above can be manufactured on lightweight 7# tissue; please add \$0.40 per unit for lightweight tissue. Lightweight tissue is considered a specialty item which requires a \$140.00 setup charge on all quantities.

HEAVYWEIGHT TISSUE

All products listed above can be manufactured on heavyweight 9# tissue for roll to sheet applications; please add \$0.32 per unit for heavyweight tissue. Heavyweight tissue is considered a specialty item which requires a \$140.00 setup charge on all quantities.

MINIMUM CHARGES

The minimum unit charge for any roll carbon is \$70.00 per item in addition to any other make-ready or special charges.

REFER TO PAGE 5 FOR OTHER MADE-TO-ORDER SPECIAL CHARGES.

Made-To-Order Slit Rolls

SPECIFICATIONS

Roll Widths	Up to 44". Order to the nearest 1/32". Slit width tolerance: Plus or minus 1/32".
Roll Striping	Stripes run continuously the length of roll. Number of stripes limited only by width of roll. Minimum width of stripes: 1/8".
Roll Length	All orders should specify desired and/or maximum length acceptable.
Roll Diameter	40" Maximum. All orders should specify maximum diameter acceptable.
Packaging	Top opening corrugated carton for smaller orders. Skids or pallets used for larger orders. Skids and pallets are packaged in clear stretch wrap.
Units	One unit equals 1" x 1000 feet long or 12,000 square inches. Width of carbon is figured exactly to compute the number units.

Made-To-Order Slit Rolls

SPECIAL CHARGES

Make-Ready Charges	\$120.00 for each item under 2,000 units. \$140.00 for Face out winding.
Perforating Charge	\$.05 per unit per line. Minimum charge of \$60.00 per line.
Internal Striping	\$75.00 for each internal stripe per item.
Face Out Winding	\$.09 per unit. Minimum \$60.00.
24-Hour Rush Charge	\$155.00
48-Hour Rush Charge	\$105.00

Spot Carbon

SPECIFICATIONS

Roll Width	3" to 21". Order to nearest 1/32". The roll width is undercut 1/32" on marginally punched side only. Minimum width for billing purposes is 10".
Roll Diameter	24" Maximum
Carbon Coating and Striping	<p>Any combination of carbonized or uncarbonized area is possible within these limitations:</p> <ol style="list-style-type: none">1. All patterns must provide a total of at least 1/16" uncarbonized area at some position across the web at every cross perforation or cut-off position. If not specified, 1/32" will be taken at top and bottom.2. Limitation on coating accuracy: 1/16" variation on each of four sides of any coated area.3. Uncarbonized stripes may run continuously the length of the roll.4. Minimum width of stripe is 1/8", plus or minus 1/32".5. Patterns requiring extensive plate cutting (as defined by Stenno Carbon Company) may be charged an extra \$55.00, \$105.00 or \$155.00. You will be notified prior to manufacturing if extra charges apply.
Roll Winding	Face in and face out.
Available Spot Cylinder Sizes	28", 24", 22", 20", 17" and 14".
Marginal Punching	6/32" diameter holes placed 1/2" vertically center-to-center. When there are double line holes, the horizontal distance between rows of holes is 1/2" center-to-center.
Tabs	<p>Two styles are available:</p> <ol style="list-style-type: none">1. Center Tab: Uses semi-circular tab with 1/16" tie at top of semi-circle.2. Corner Cut: Provides a triangular extraction feature at edge of form. Corner cut stops 1/16" short of marginal punching.

Spot Carbon

SPECIAL CHARGES

Make-Ready Charge	\$145.00 Make Ready Plate Charge per item.
Ink Change (Same Pattern)	\$65.00
Change In Pattern Width	\$60.00.
Longitudinal Perf	\$.05 per unit per line. Minimum \$60.00 per line.
Tab Cut	\$.09 per unit per tab. Minimum \$60.00 per tab.
Cross Perf	\$.09 per unit per line. Minimum \$60.00 per line.
Face Out Winding	\$.09 per unit. Minimum \$60.00.
5/32" Punches	\$70.00
Flex Cut	\$.09 per unit per cut. Minimum \$60.00 per cut.
24-Hour Rush Charge	\$155.00
48-Hour Rush Charge	\$215.00
Doubleface Spot Make-Ready Pattern/Full	\$215.00
Doubleface Spot Make-Ready Pattern/Pattern	\$410.00

NOTE: If two jobs can be run in succession with one plate, there is only one set-up charge for both.

Process Carbon

PRICE LIST

(Prices Include Marginal Punching)

STANDARD – 9 LB.			
DESCRIPTION <i>Process Carbon</i>	CARBON CODE	PRICE PER UNIT	
		1-1000 UNITS	1001+ UNITS
Medium Black	8E4PC	1.6650	1.6250
Intense Black	8E2PC	1.6850	1.6450

MINIMUM CHARGES

The minimum unit charge for any spot or process carbon is \$70.00 per item in addition to any other make-ready or special charges.

REFER TO PAGE 11 FOR PROCESS CARBON SPECIAL CHARGES.

Process Carbon

SPECIFICATIONS

Roll Width 3" to 21". Order to nearest 1/32". So carbon paper does not protrude from the edges of the form, roll width, as ordered, is undercut 1/32" on marginally punched side or sides.

Roll Striping Stripes run continuously the length of the roll. Minimum width of stripe is 1/8". Manufacturing tolerance of striping is plus or minus 1/32".

Cross Perf Length

28	14	7	3 1/2	
22	11	7 1/3	5 1/2	3 2/3
17	8 1/2	4 1/4		

Marginal Holes 6/32" diameter holes placed 1/2" vertically center-to-center. When there are double line holes, the horizontal distance between rows of holes is 1/2" center-to-center.

Tabs Two styles are available:

1. Center Tab: Uses semi-circular tab with 1/16" tie at top of semi-circle.
2. Corner Cut: Provides a triangular extraction feature at edge of form. Corner cut stops 1/16" short of marginal punching.

Longitudinal Perfs Continuous the length of the roll. Can be placed at one or more positions along the length of the roll, but no less than 1/4" from either edge. Standard perforation is 6 ties per inch. Perforation tie is .035".

Process Carbon

SPECIAL CHARGES

Make-Ready Charge	\$145.00 Make-Ready Charge on all items.
Longitudinal Perf	\$.07 per unit per line. Minimum \$60.00 per line.
Tab Cut	\$.09 per unit per tab. Minimum \$60.00 per tab.
Cross Perf	\$.09 per unit per line. Minimum \$60.00 per line.
5/32" Punches	\$70.00
Face Out Winding	\$.09 per unit. Minimum \$60.00.

Double Face Carbon

PRICE LIST

STANDARD – 8 LB.		
DESCRIPTION <i>Double Face Carbon</i>	CARBON CODE	PRICE PER UNIT
Medium Black	9DF6	1.4250
Medium Blue	9DF7	1.4650

SPECIAL CHARGES

- Make-Ready Charge** \$140.00 Double Face Make-Ready Charge per item.
- Perforating Charge** \$0.05 per unit per line. Minimum charge of \$60.00 per line.

Flexperf Carbon

Flexperf Carbon is designed to allow glued continuous forms a degree of flexibility to relieve the “tenting” effect experienced with multi-ply forms.

PRICE LIST

For **Flexperf Carbon** pricing, add \$0.30 per unit to Made-To-Order bracket pricing on page 4 of the catalog.

SPECIAL CHARGES

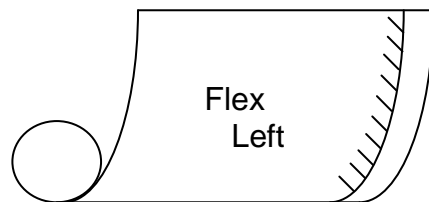

Make-Ready Charge \$140.00 Make-Ready Charge on all quantities.

Flex-Perf Charge \$60.00 per flex-perf.

Designs Offered:

1/8" Cer

1/8" Cer

- Carbons Flex Right and Flex Left must be alternated in the form.
- One glue line should be on the 1/8" clean edge – glued down.
- One glue line should be inside the flex slits on the uncoated top of the carbon tissue.
- Stub width on the glued side of the forms should be at least 3/4"

Coated Book Carbon
(White Paper)

PRICE LIST

DESCRIPTION <i>Coated Book Carbon</i>	CARBON CODE	PRICE PER UNIT
Black Coated Book	28B4	1.8050
Blue Coated Book	28B5	1.8750

Flat Sheets (One-Time Carbon)

GENERAL INFORMATION

Sheet Striping

- Stripes run continuously the length of the sheet. Number of stripes limited only by the width of the sheet.
- Minimum width of stripes – 1/4”
- Manufacturing tolerance of striping is plus or minus 1/32”

Packaging

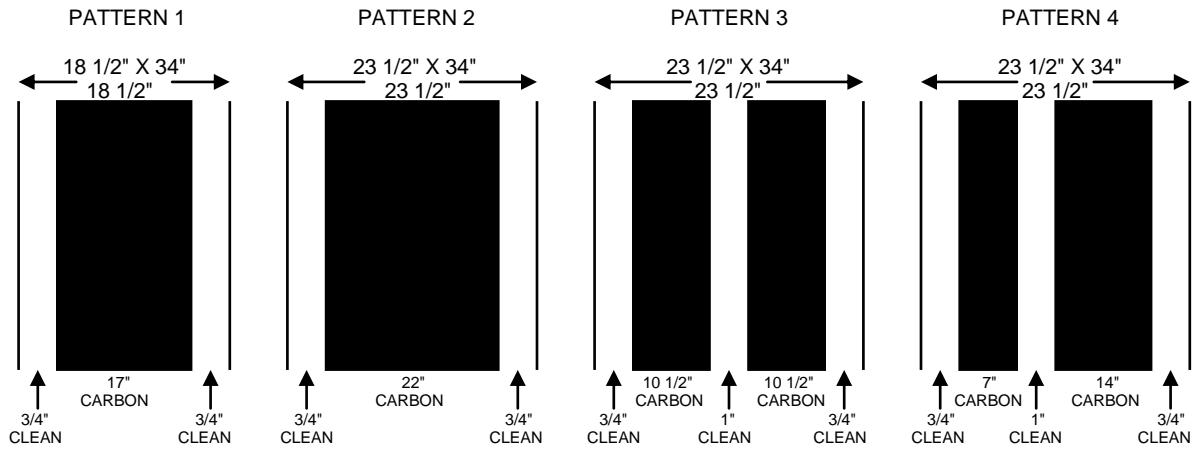

- Standard Package – 1000 sheets (2 reams)
- Chip board dividers on top, bottom and between sheets 500 and 501.
- Contents label on one end.

Curl

Curl in flat sheets is due cause for rejection of carbon if the curl exceeds plus or minus 10% from horizontal at 50% relative humidity and 78°F, providing there are no other contributing factors such as carbon becoming wet in transit, excessive temperature and/or humidity in storage in forms manufacturers’ plants or unsuitable storage practices such as placing cartons on edge or improperly stacking packages. Measurement of curl is determined by laying sheets of carbon on a flat surface and visually determining amount of lift of the edges.
